**Corporate & Securities Section; Chair of**  
**Technology Practice Group; Co-Chair of**  
**Cybersecurity Practice**

"Securing cyberspace is one of the most important and urgent challenges of our time."

~Senator Jay Rockefeller, Chairman of the Senate Commerce, Science and Transportation Committee

# The Problem

- Attacks are now systemic
- Directors and Officers have a fiduciary duty to protect assets

# Carnegie Mellon – CyLab 2012 Report

- Used Forbes Global 2000
- Boards and senior management still not exercising proper governance

<b>Best Management Practice</b>	<b>Regularly</b>	<b>Occasionally</b>	<b>Rarely or Never</b>
Board reviews & approves top-level policies on privacy & IT security risks	23%	28%	42%
Board reviews & approves roles & responsibilities of lead personnel responsible for privacy & IT security	19%	18%	66%
Board reviews & approves annual budgets for privacy & IT security programs	28%	10%	54%
Board regularly receives reports from senior management regarding privacy & IT security risks	38%	34%	25%

# Carnegie Mellon – CyLab 2012 Report

- Boards & management pay attention to enterprise risk management (92%)
- Disconnect: Boards & management still do not make privacy and security and IT part of risk management

# How Does It Happen?

- Targeted Attack
  - Anonymous gets angry; Competitor hack
- Intentional Employee Theft
  - i.e. Data sent offsite
- Equipment Theft
  - i.e. Laptops or mobile device stolen from vehicle
- Employee Error
  - i.e. Emails oops

# What is the Nature of Risk?

- Class Actions/Consumer Litigation
- State Law Breach of Contract Claims Resulting from Privacy Policy
- Bank/Credit Card Company Breach of Contract (i.e. requirements to maintain PCI DSS compliance)
- Governmental Authorities (AGs & FTC)
- Chargebacks (Credit Card Data)
- Public Relations Harm:  
State/Federal/International Law Notice Requirements

# What Do The State Laws Require?

- Notification Obligations
  - Notification to Customer
  - Notification to Consumer Reporting Agencies
  - Notification to Applicable Local or Statewide Media
  - Potential Exception: Adopt Company Notification Policy
- Penalties/Fines
- Duty to Properly Destroy
- Optional: Provide Credit Monitoring Services to Breach Victims
- Note: Potential Waiver by Contract

# The SEC

- Letter to Chairman Schapiro
- Responded in June '11
- Guidance issued in October '11

# SEC Guidance

- Risk factors
  - (See Appendix)
  - Description of outsourced functions that have material cybersecurity risks;
  - Description of cyber incidents experienced by the registrant that are material, including a description of the costs and consequences; and
  - Description of relevant insurance coverage for cyber incidents.
- MD&A
  - Cost
- Business
  - If there has been an incident
- Legal Proceedings
- Financial Statements

# What Should Corporate Boards Do?

- CTO/Chief Security Officer – Direct Report (or Report to Audit or Risk Committees)
- Disclosure Committees
- Risk Oversight – "disclosure about the board's involvement in the oversight of the risk management process should provide important information to investors about how a company perceives the role of its board and the relationship between the board and senior management in managing the material risks facing the company."

# What Should Corporate Boards Do?

- Insurance Policies
  - Prior to the Breach – Hack Insurance/ Cybersecurity Insurance
  - After the Breach
    - CSIdentity
    - Debix
    - Experian Credit Bureau
- Security Audits
  - Document Retention Policies
  - SAS70 Now SOC
    - SOC 1 - Report on Controls at a Service Organization Relevant to User Entities' Internal Control over Financial Reporting
    - SOC 2 - Report on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality and/or Privacy
    - SOC 3 - Trust Services Report

Financial Reports  
(SSAE 16)

Non-Financial  
Reporting (AT101)

## Sample Risk Factor

**Security breaches and other disruptions could compromise our information and expose us to liability, which would cause our business and reputation to suffer.**

[In the ordinary course of our business, we/We] [collect and] store sensitive data, including intellectual property, our proprietary business information and that of our customers, [suppliers and business partners,] and personally identifiable information of our [customers and] employees, in our data centers and on our networks. The secure [processing,] maintenance [and transmission] of this information is critical to our operations [and business strategy]. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, [liability under laws that protect the privacy of personal information,] [and regulatory penalties,] [disrupt our operations [and the services we provide to customers],] [and] damage our reputation, [and cause a loss of confidence in our products and services], which could adversely affect our [business/operating margins, revenues and competitive position].
